# iatrixAir Launches Investment Campaign on Netcapital

PRESS RELEASE MAY 17, 2022 09:00 EDT

PASADENA, Calif., May 17, 2022 (Newswire.com) - iatrixAir, Inc. is launching its pre-series seed investment campaign on Netcapital, a leading startup crowdfunding innovation platform that enables entrepreneurs and investors to work together to build value.

Indoor airborne pathogens are now proven to linger in the air longer in aerosol forms. The team at iatrixAir believes that to stop these dangerous pathogens such as CV-19, the solution must be real time and absolute.

iatrixAir has engineered a patent-pending AI based solution that detects, removes, and destroys airborne pathogens faster than industry standards. iatrixAir accomplishes this on the first pass based on their aeroTru3 complete space technology that reflects the cubic feet of a room. iatrixAir's target markets are the 25M commercial restrooms and Major League/University/High School sports locker rooms in the US. The company is also introducing "air quality as a service or AQAAS" business model with low-cost monthly fees, bringing a new paradigm in addressing indoor air quality problems.

"We are pleased to complete the Netcapital compliance process and start our pre-series seed investment round using this innovative platform," commented Marc McConnaughey, President/CEO of iatrixAir.

"With the recently announced Indoor Air Quality Building Challenge supported by tax credits and the last two years of dealing with yet again another airborne pathogen COVID-19, US building facility managers and operators/owners have incentives to take action to insure safe and healthy air for workers and visitors to their buildings," added McConnaughey.
