

Matthew P. Jones, Ph.D.

Chief Executive Officer

Greetings Investors!

I'm pleased to announce the next version of our mobile app (v2.0) is available now at the Apple Store and Google Play store. This latest version includes a number of important features, which improve the User Experience (UX), *and* reach out to a wider audience. Since deploying v2.0, we have new commitments of over \$500,000 in Assets Under Management (AUM). This is a strong indication that we are moving in the right direction.

Improved UX

We have updated our Models tab, making it easier for clients to review our recommendations and to obtain information about each Model. Additionally, we built in capability to display Model performance metrics, both numerically and graphically. We also improved our Dashboard layout. Now, clients can connect multiple IBKR accounts to our Dashboard, and toggle between them in order to keep things organized.

Growing AUM

Considering that most individuals have changed employers at least once during their career, many are holding onto a neglected retirement account. So, we added a link to the IBKR tab that facilitates the process of rolling it over to an IRA or Roth IRA account, which Quants Compete will manage. We anticipate this rollover feature will be a big driver of AUM growth and operating income.

Thank you for your support!

-Matt
