RELEASE DATE:

September 30, 2022

AIEDC ATTENDS "CALIFORNIA'S SBDC SMALL BUSINESS CONFERENCE".

The Conference was held on Friday and the theme was **"Are You Ready to Grow Your Business"**, and included Several Hundred Businesses that were in attendance, as well as bringing together many Chamber of Commerce's, that represented **Hundreds of Thousands of Businesses**.

One of the main Sessions were **"Creating a Digital Presence for your Business"**.

However, there was No Discussion regarding **"Mobile Apps"** for Small and Midsized Businesses, and during Break Out Sessions, AIEDC's CEO discussed with Speakers and Panelists, that Digitization efforts have to include the ability for Small and Midsized Businesses to have their own Mobile App to be **"Economically Viable" in the Future** --- according to a recent McKinsey & Company report.

Mr. Johnson also noted that ***"Hurricane Ian" will have "Devastating Effects" on the Small and Midsized Businesses Community in Florida for quite some time to come***, and that the recovery effort would also be very difficult because the majority of these Businesses do not have their own Mobile App to conduct business and communicate with their customers from any location.

Looking forward, AIEDC believes that **(CLIMATE CHANGE)** and **(CLIMATE MIGRATION)**, will continue to be a significant **(PAIN POINT)** for the Small & Midsize Business Communities throughout the World.

Furthermore, AIEDC is in discussions with the SBDC Network Director in reference to Partnership Opportunities to get the word out regarding AIEDC'S **"5G - Cloud Mobile App Maker"**.

About AIEDC

The Artificial Intelligence Economic Development Corporation (AIEDC), is an A.I. as a Service (AIaaS) Provider with a 5G - Cloud Mobile App Maker that will use Machine Learning to help small and midsize businesses create their own (IOS & Android) Mobile Apps with No-Code or Low-Code --- so they can engage and service their Customer Base, as well as provide Front & Back Office Digitization Services for SMB's.
